### What is divine energy

Ancient Hindu civilization was replete with many texts and sacred scriptures. It was also known for its great advancement in science and technology. The ancient Hindu temple architecture is but one example, some of which has survived both nature and man's wraths. So it should surprise no one when a modern Indian mind plunges into matters divine and that too with a management approach.

Indian American professor of management, Dr. Vipin Gupta, who has been globally recognized for his Project VIPIN (Vastly Integrated Processes Inside Nature), has authored six books related to his path-breaking work in this not much known about but very profound realm.

He published four books earlier this year, which capture the issues of divine energy and present reality. His two latest books around his project, delve into the hidden mysteries of mother nature around the most sought-after issues of consciousness and para-consciousness.

His writings show the great inter-connectivity of modern science and the ancient religious and spiritual world. Challenging various laws of modern sciences, he explains the application of metaphysics in great detail linked with everything around us.

Dr. Vipin Gupta said, "My 5th book, What is Consciousness reveals the secret origin of consciousness, soul, spirit, entity, space, and time, where I explain how to evaluate, organize, and transcend the fragmented consciousness within the three dimensions of time, four dimensions of space, and three dimensions of the entity. My 6th book, What is Para-Consciousness reveals the secret thread of life that lies hidden within our para-consciousness. This year, I plan to write 6 more books covering various aspects of the project VIPIN."

In his literary works, Dr. Gupta takes a management approach to advancing sciences while explaining the hidden mysteries of nature, relationships of scientific advancements with the

processes existing in mother nature.

Nothing objective in science

As an academic, he believes that there is nothing objective in science and every theory of mind needs to be managed using our full senses. He believes that scientists dismiss objectivity as classical determinism and consider subjectivity as the essence of modern science, and therefore he recommends a sensible management approach instead of a scientific management approach.

According to Dr. Gupta, energy has varying values because we modify the value of energy through varying consciousness forms. A neutron, an atom, as well as a cell, embody the unmodified value of energy. He substantiates his energy valuations with the concepts from India's ancient wisdom and modern international science. He applies a management approach for developing a sensible understanding of divine energy for use in our daily lives.

His fifth book, *What is Consciousness* explains that our reality is unknown because we are the makers of our future. The soul is conscious of our future because our consciousness conditions our organizational planning. We become conditioned to believe that our psychic linkages make us human, caring about our social, human, ecological, economic, national, and psychological well-being. However, our psychic linkages are the causative factor attracting us to discover, trade, subordinate, consume, and destroy the global, unique, inclusive, diverse, engaged, and responsible entities.

And the latest in the series of Project VIPIN, his 6th book, *What is Para Consciousness*, reveals the secret thread of life that lies hidden within our para-consciousness. It talks about the potential within our para-consciousness that is transformed naturally through the meiosis, mitosis, and methanogenesis processes that project our energy into "infinity." He lucidly explains how para-consciousness is the consciousness borrowed from the future, helping illuminate our life's goal for enjoying the potential the future holds. This book also highlights how leaders and mass movements are created via para consciousness.

According to Dr. Gupta, Mother Nature's "essence" is the common subject of the Project VIPIN, which illuminates appropriate explanations of the cause-effect sequences manageable using the management power of our intentionality. It highlights the consequences of mediating those sequences with one's consciousness filled with emotional intensity or moderating them with one's conscious devotional intensity.

The first four books by Dr. Vipin Gupta viz. *What is Divine Energy*, *What is Present Reality*, *Is Present Reality*, and *Is Divine Energy* are now available in full and nutshell editions on Amazon and elsewhere as paperback, hardcover, digital, and audible forms.

Dr. (Prof.) Vipin Gupta is a professor of management and a co-director of the Center for Global

Management at the Jack H. Brown College of Business and Public Administration, California State University, San Bernardino. Dr. Gupta has a Ph.D. in managerial science and applied economics from the Wharton School of the University of Pennsylvania
